

Wheel Seal Bearing Kits

Protection from intense off-road contamination and frequent high pressure washing

SKF utilizes decades of bearing sealing experience to provide solutions that gives the ultimate riding experience with reduced friction, increased service intervals and longer bearing life. The Wheel Seal Kit also includes SKF bearings.

F = FRONT

R = REAR

Benefits

- Increased sealing efficiency
- Reduced friction and power loss
- Spacer enables ideal running surface
- Longer bearing life
- Resistance to high pressure water wash
- Longer service intervals
- Overall higher reliability
